The UKT-31 is a full height stainless steel turnstile that can be supplied either with mechanical (non-powered assisted) or motorised operation. All our range come with three rota position - 120° size only. This wider design allows users to enter carrying small items like pack packs while still providing secure access.

An LED display has been fitted in to the lid directly above the walkway to show passage authorization. An active passage width of 670mm makes this product suitable for a wide range of environments where single or multiple lane access is required.

In the event of a fire alarm both mechanical & motorised units can be configured to free rotate.

**Key Product Features:**

- Mechanical (non-powered assisted) or motorised operation
  - 120° rota position (3 rotas)
  - Single or bi-directional passage
  - Stainless steel housing & rotas
  - LED authorisation indicator
  - Passage width 670mm
  - Push button remote control panel included
- Compatible with all types of electronic access control systems
